Configuring your Macintosh with OS X Version 10.4

1. Click on the AirPort icon at the top right corner of your screen. There should be a list of networks available. Choose Student.

2. A logon window will come up. Enter your B-W network username and password.

3. A screen may come up stating that the server certificate is signed by an unknown root certificate authority. If you wish to (although it is not necessary to connect to the wireless network), you can click on Show Certificate, and under the certificate...
name in the Trust Access menu, choose Always Trust. Then click Continue.

4. You are now connected to the wireless network!
